

Kids Workshop: Spontaneous Painting and Hand Printing

We invite children aged 8 and up to an exciting creative workshop where they will explore a unique printmaking technique — **monotype**.

Monotype is a special printing technique that combines painting and printmaking. Paint is applied to paper or glass in a spontaneous way and then transferred onto another sheet. The result is beautiful images with soft lines, interesting textures, and unique effects. Each print is one of a kind — no two are the same!

During the workshop, children will:

- learn the monotype technique
- experiment with colors and shapes
- create their own original prints
